

Concord, NC Website and Hosting

We are pleased to announce the go-live of the newly rebuilt iconnect.com website! The website was originally developed using old traditional methods. This made it very difficult to keep the content on the site fresh and current and required the use of a web developer for any updates. [STB Web](#)

[Services](#)

took the original design of the and rebuilt the site utilizing the Joomla Content Management System (CMS). This allowed iconnect to maintain the same look and feel to their site, but also made the site much more manageable. All content on the site can be updated by a user friendly, web based interface which features editing tools much like standard office tools.

Again...welcome iconnect.
