

Charlotte Web Design and Hosting

We are pleased to announce the go live of the newly designed [Williamson's Chapel UMC](#) website! WUMC wanted a website that was clean design, easy to use, but also incorporate a very large amount of content. To meet the needs of Williamson's Chapel United Methodist Church, we utilized our professional graphic designers to develop a new fresh and clean web design that not only looks great on a PC, but also is responsive to mobile and tablets. This provides a seamless user interface no matter what device is used to browse the website. WUMC's website also includes over 100 pages of content potentially making it a challenge to navigate. STB accepts this challenge and creates a dynamic menu system which expands and collapses allowing access to the vast amount of content in an intuitive menu layout. Other features include: a dynamic latest news section displaying the most recent news articles published; automated home page slideshow showcasing upcoming events; a dynamic drop down to quickly display directions and service times for the church; and many more!

Again, welcome WUMC!
